Thanks Gary for the update. It's a long story- is the answer to your question. Bottom line – no money.

Subject: RE: Status of F.J. Doyle Site

Richard:

Prior to Harvey, I had issued a TDD to the START Contractor to consolidate the data and put it in a flexviewer and begin the process of getting parcel information to begin access. We have not yet viewed all the data and developed a sampling plan. I need to get back on it fairly soon.

Do we know why nothing was done previously when the facility was operating to make the company do a cleanup for the contamination created both on and offsite?

Thanks
Gary Moore

Subject: Status of F.J. Doyle Site

Gary, Laurie King was interested in the status of the F.J. Doyle site in Leonard, TX. I know Greg went out to the site a couple of months ago. Any actions planned? Thanks.
